I came in contact with Remax on replying to an online ad for sale of a residential flat at Sodpur. The purchase is in the process of being completed. Buying a property through a property broker was something I had at one time thought of as totally superfluous. But I soon realised that brokers with presence all over India, are essential especially when there is a gulf of a thousand kilometers separating buyer and seller. I feel brokers will soon play a vital and much bigger role in bridging this gulf, and make the Indian property market fluid so that PAN-India buying and selling of property will become easier thereby unknowingly serving the cause of national integration.. As regards my own experience with Remax, it has till date been a pleasant one. Much of the paperwork and headache has been taken care of by Jaydip and Suresh of Remax, both of whom are well-informed and prompt. I am confident they will make the dreams of many more first-home buyers come true."
